

Fullstack Developer (Ruby/Elixir)

Hey there! We're Canary Data, a company that build tools for the finance risk industry. We're currently on the lookout for a talented Full-Stack Engineer with expertise in Elixir/React to join our team?

About the position

As a Full-Stack Elixir Developer, you will be responsible for developing and maintaining our robust and secure financial technology platform. You will work closely with cross-functional teams to ensure the seamless integration of various components and contribute to the enhancement of our user experience.

Required experience

- Proven experience working with Elixir, preferably within an umbrella application structure.
- Strong proficiency in React for building dynamic and responsive user interfaces.
- Experience with PostgreSQL.
- Knowledge of working with AWS Lambda for serverless computing.
- Familiarity with implementing and managing applications using Redis for caching purposes.
- Experience in building scalable and fault-tolerant systems with Kafka.
- Proficiency in Docker for containerization and deployment of applications.
- Ability to work with S3 for secure and efficient file storage and retrieval.

Qualifications

- Bachelor's degree in Computer Science, Engineering, or a related field.
- Proven experience working in a fast-paced development environment, preferably in the finance sector.
- Strong problem-solving skills and the ability to think critically and analytically.
- Excellent communication and collaboration skills with the ability to work effectively in a team setting.
